

## The Reading Comprehension House

**Reading comprehension**

The goal of teaching reading is to enable children to comprehend written texts. To do this, pupils need to build both **word reading** and **language comprehension** skills. These two key components of reading are supported by a broad academic consensus and underpinned by research evidence.

The 'reading comprehension house' below illustrates that word reading and language comprehension are underpinned by a number of other building blocks of reading. These component parts build on one another and connect together as children learn to read.
